## **AZUREE 33C WINS THE TROFEO DE LAS FUERZAS ARMATAS IN PALMA DI MAIORCA**

***A major victory for the hull designed by Giovanni Ceccarelli in one of the most important regattas in the Spanish landscape  
Once again Azuree 33C shows itself to be extremely performing***

A great achievement obtained by Azuree 33C and Eduardo Horrach, that won the 39th edition of the Trofeo de las Fuerzas Armadas, one of the most important regattas in the Spanish nautical landscape, organized by the Real Club Náutico de Palma, the Federación Balear de Vela and the Comisión Naval de Regatas de la Armada.

The hull designed by Giovanni Ceccarelli was awarded the third place on the water and the first of all hulls class ORC, leaving behind more than 50 boats involved.

An achievement which confirms the sporting purpose this model: the hull has a pronounced beam for improved performance to windward, given it's inherently stable form. The 33c's hull shape loves a stiff breeze, but is still quick and harmonious in lighter airs. The new version also has optimized appendages for better performance.

Another interesting feature is the availability of a special performance package for the rig, perfect for owner's who want to try out their racing skills.
